Q. Study of any web testing tool (Selenium)

Step 1: Launch Selenium IDE

1. Open the browser and click on the Selenium IDE extension.
2. Create a new project and enter a suitable project name.
3. Enter the URL https://www.wikipedia.org/.

Step 2: Use assert title Command

1. Click on **Add Command**.
2. Enter the command as assert title.
3. Copy the page title using the browser's Inspect option.
4. Paste the copied title into the **Value** field.
5. This command checks whether the page title exactly matches the expected title.
